PROFESSIONAL SUMMARY

Senior Lead Software Engineer with 6+ years of experience designing, developing and optimizing complex enterprise banking and treasury applications. Hands-on expertise in C#, .NET 8/ASP.NET Core, Angular, React, REST APIs, SQL Server, Oracle, PostgreSQL, system design, Azure DevOps. Proven experience leading teams of 3-4 engineers, architecting solutions from concept to production, translating business requirements into scalable technical outcomes, mentoring developers, and driving performance, maintainability and reusable engineering improvements. Currently leading the architecture of an enterprise Balance Sheet Management suite.

CORE COMPETENCIES

Solution Architecture & System Design | C# | .NET 8 / ASP.NET Core | Angular | React | TypeScript | JavaScript | REST APIs | SQL & Database Design | Entity Framework Core | Dapper | SQL Server | Oracle | PostgreSQL | Microservices | Distributed Systems | Design Patterns | Domain-Driven Design | Azure DevOps | CI/CD | Git | Technical Leadership & Mentoring | Architecture Reviews | Performance Optimization | Stakeholder Collaboration

PROFESSIONAL EXPERIENCE

Surya FinTech | Bengaluru, India

Senior Lead Engineer

Apr 2026 - Present

- Lead architecture and product design for the enterprise Balance Sheet Management (BSM) application suite, translating complex banking requirements into configurable and scalable solution components.
- Design modules spanning balance sheet, asset & liability management, capital, liquidity, income, funds and enterprise reporting.
- Drive technical direction, architecture reviews and engineering best practices across the product suite.

Lead Engineer

Aug 2022 - Apr 2026

- Led multiple product teams of 3-4 engineers delivering complex enterprise banking products from solution design through implementation.
- Architected backend systems, REST APIs and database models, working closely with product owners and banking domain experts to convert business priorities into practical technical solutions.
- Mentored developers while remaining hands-on, providing technical guidance on solution design, engineering practices and problem solving.
- Reduced batch processing time from approximately 10 minutes to under 30 seconds through architecture and query optimization.
- Designed reusable workflow and reporting frameworks used across products to improve consistency and engineering reuse.

Selected Product Delivery

- **Risk Aggregation:** Built from scratch as Lead Engineer with a 2-member team; designed the application architecture, workflow engine and reporting infrastructure.
- **Expected Credit Loss (IFRS 9):** Built from scratch with a 3-member team; designed PD, LGD, segmentation, stress scenarios and a configurable execution engine.
- **Interest Rate Risk in the Banking Book (IRRBB):** Backend development and regulatory reporting.
- **Funds Transfer Pricing (FTP):** Backend services and pricing engine development.

Surya Software Systems Pvt. Ltd. | Bengaluru, India

Senior Software Engineer

Mar 2022 - Aug 2022

Software Engineer

Feb 2020 - Feb 2022

- Developed enterprise web applications using .NET Core, JavaScript and SQL Server.
- Built REST APIs, implemented business logic, contributed to database design, and optimized database performance.

ARCHITECTURE & DOMAIN EXPERTISE

Architecture: System Design, Microservices, Distributed Systems, Design Patterns, Domain-Driven Design, reusable workflow and reporting frameworks.

Banking & Treasury: Balance Sheet Management, Asset & Liability Management, Risk Aggregation, Expected Credit Loss (IFRS 9), IRRBB, Funds Transfer Pricing, Treasury & Risk Management.

EDUCATION

Bachelor of Technology (Electronics and Communications Engineering) | Cochin University of Science and Technology | 2014 - 2018
